Dear Hiring Professionals,

My name is Jacob Korn, and I'm excited to apply for your open position. With a background in computer science and hands-on experience building scalable software solutions, I'm confident I can bring both technical expertise and fresh energy to your team.

As co-founder and Principal Developer at Box K Software, I've led the design of AI-driven tools that help sales teams work smarter. One of which is a full-stack data annotation pipeline that I built—combining a React interface, Node.js APIs, Azure services, and Dynamics 365 integration—to deliver high-quality CRM data for machine learning and analytics. This experience has sharpened my skills in Python, C#, JavaScript, SQL, and cloud platforms like Azure and Power Apps.

Before that, I completed two internships at Trynzc where I worked on projects ranging from error-handling frameworks to database optimization. Those roles gave me valuable exposure to CI/CD practices, Agile workflows, and production monitoring, while reinforcing the importance of reliability and maintainability in every solution.

I enjoy tackling complex problems, but I also value clear communication and collaboration. Whether working independently or with a team, I bring a detail-oriented mindset and a drive to keep learning. I'd love the chance to contribute that same approach to your organization.

Thank you for your time and consideration. I look forward to the opportunity to discuss how I can support your team's success.

Sincerely,

Jacob Korn
